

transforming
beyond
technology

Transformation is a **journey**.
We're with you **every step**
of the way.

Who We Are

We are a passionate group of engineers, scientists, operators, project managers, and designers committed to your success. Whether your challenge is big or small, our team is ready to help.

At Streamline, we believe in getting the most out of your technology investments by using effective strategies and delivery methods.

The Streamline Approach

Our successful track record is based on a 'Partnership Culture', which lies at the core of our commitment to you.

When you choose Streamline, you are choosing a collaborative experience from beginning to end, with a holistic approach to effectively plan, scale, and deliver solutions to drive your business forward.

What We Do

Full stack IT/IOT solutions

Project execution from design to cutover

Data visualization & high performance HMI design

MQTT/IIoT architecture and implementation

OT edge solutions & cloud integration development and execution

Transforming Beyond Technology

Successful transformations require holistic changes in how a business operates. This may include human resources, processes, and technology. These changes help organizations compete more effectively, become more efficient, or make a meaningful impact.

At Streamline, we will guide you through the entire transformation journey.

Strategic Planning

This is where we communicate and reinforce the business vision and overarching message across the organization. Strategic planning brings clarity, direction and focus for the organization and pushes the company to reach the strategic vision.

Roadmap Development

The roadmaps required to support transformation include capability, technology, and data strategy roadmaps. Streamline will assess these and confirm they are aligned, and where they do not exist, we will help you develop them to achieve success.

Assessment & Staging

Being proactive and organized can reduce costs and increase transformation efficiency. In assessment and staging, we do a complete evaluation to identify potential headwinds and the organization's readiness to transform.

Portfolio Design & Management

Once executed, these are the initiatives to move your organization through the transformational stages. A balanced portfolio will maximize your investment and achieve the vision.

Operational Excellence & Value Realization

This is where the rubber hits the road where we achieve and demonstrate values resulting from implementing a new or improved product, solution, or service. Together, we will execute strategies and tactics to help the organization achieve operational excellence and value realization.

Technology Implementation

Anticipating and preparing for the coming technology shockwave requires industry-specific guidance and knowledge. Streamline's Technology Strategy and Advisory services help reinvent organizations and build business value.

Industries we work in:

Oil & Gas

Utilities

Smart Cities

Renewable Energy

Technology that Enables

Our successful track record and deep industry expertise puts us in a unique position to help you activate the right technology that maximizes the value out of your investments and addresses the most complex challenges.

Operational Data

Our operational data specialists provide best in class delivery in an agile and cost-effective way to build solutions that allow businesses to leverage their data assets and make important decisions in a meaningful way.

SCADA

With years of expertise and experience, we provide an exceptional delivery methodology and an unbroken track record in integration, display building, database building, point-to-point checkouts and cutovers.

IIoT and Middleware

Using an MQTT middleware data architecture, Streamline has helped future-proof the digital transformation journey for our clients by providing access to superior quality and previously untapped real-time data.

Communications

The communications and networking service is a significant part of how we can offer "end to end" value-added architectural and implementation services for our clients.

Technology we work with:

Power of Data

Operational data plays a significant role in assuring the proper opportunities are being utilized in meaningful decision-making.

Our engineers, subject matter experts, and graphic designers build operational displays and dashboards with your business and its users in mind.

What We Do

Consulting & Design

We work with you to understand your challenges, provide guidance and advice to find the best solution, so you get the most out of your data and technology investments.

Visualization

Our engineers, subject matter experts, and graphic designers build beautiful and functional operational displays and dashboards with your business and the users first and foremost.

Implementation & Integration

Together, we will collaborate to design and deliver the best architecture to meet your needs. With a focus on minimizing cost, your business goals are our priority while delivering the most capability.

Data Acquisition & Contextualization

We understand the end-to-end picture of the ecosystem and can help you build robust data acquisition systems and help you organize, structure, and manage your operational data.

System Support

Our system services are here to maximize your investments further, including optimization and tuning, migration, upgrades, and administration and provide general support for any technical issues that may occur.

Start your journey with us.
